*Software Engineer*-Cisco Systems Summer 2013

- Developed JavaScript tooling for collecting user feedback, bug tracking, and HTML5 based screenshot used with alpha customers during initial product launches.
- Led a team of 12 other interns to develop a novel food ordering system for cafeterias that used containerized Node.js and MongoDB applications allowing efficient scaling.

*Co-Founder/Software Engineer*- Gapelia 08/2013-05/2014

- Built an end to end digital multi modal publishing platform which allowed non-technical users to create and publish beautiful digital magazines in a matter of minutes.
- Created REST API in Java, front end in Express, and deployed in AWS with Apache Tomcat, Maven, and MongoDB.
- Won the RPI 2014 Business Model Competition 1st place, 2014 Why not change the world grant, Harvard iLab cultural entrepreneurship challenge, and was member of Harvard's Innovation Lab 01/2014-05/2014.
